## FEATURES

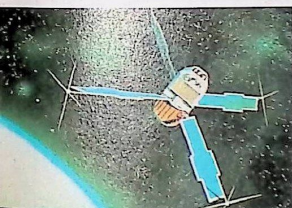

PH: FULLY/CNRS

Physics of photons: exploring the mystery of light, p 30

Pete Addis

Prophetic vision: Norman Moore, one of the first green scientists, p 34

NASA/SPL

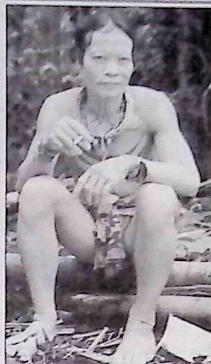

This week's cover is by Dilip Mehta/Colorific

## NEXT WEEK

**Closing in on arctic ozone**  
Next week, European researchers start to unravel the fate of ozone in the skies above the North Pole

**Forensic science in the dock**  
Boron, bumps and the big bang

**The genesis molecule**

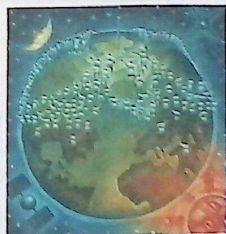

A people in peril: what future is there for Indonesia's Mentawai? p 14

Im Ryan/Lanzoni/Mark Spooner

Accidents do happen: engineers and error, p 38

Seeing the invisible: X-ray astronomy takes off, p 44

Serial Axis

**Soviets search for partners in space** 17  
As its economic crisis deepens, the Soviet Union is banking on international collaboration to keep its space programme aloft  
*Helen Gavaghan*

**COVER: India wakes up to AIDS** 25  
As Asia faces the prospect of an epidemic of AIDS, Indian health workers are becoming increasingly alarmed at how little has been done to prevent the spread of HIV  
*Omar Sattaur*

**What is light?** 30  
Is light a wave, a particle, or both? Studying single photons could provide clues to the central mystery of quantum physics  
*Dipankar Home and John Gribbin*

**A green in the machine** 34  
As a government scientist, Norman Moore both showed how pesticides damage wildlife and framed laws to control them  
*Tom Wakeford*

**The fallible engineer** 38  
Australian engineers feel that they are being blamed for accidents and failures that are beyond their control. They want the public to understand that experts are only human  
*Sharon Beder*

## NEWS

**This Week** 10  
Industry scorns climate predictions/Telephone card risks/Military research in universities/Pollution mars Britain's rivers/Lockyerbie's aftermath/Quake threatens Indian dam/Protons and electrons clash in HERA/In Brief

**Science** 19  
Signs of a lumpy big bang/Sawfly larvae's defence/The king of genetic codes/Unusual comet compound/Monkey experiments and HIV/The immune response to sperm

**Technology** 22  
Computer advises on releasing mental patients/Smart dustbin/Gene gun makes better rice/Breeze from trains/Flying phones/Microphone spots ailing hearts/Lasers cast light on the brain

## VIEWPOINTS

**Talking Point** 8

**Review** 43  
Illustrating the planet's health/Infectious villains/Astronomer's Universe/Computer street punks/Walking the tightrope/Greening of Europe/Quiz time in space/Designed in Japan

**Forum** 48  
Brazil puts on a show for the English/Banking on the environment/Dusty days in new Romania/Pollution most foul/Thistle Diary/Enigma/Feedback

**Life, the Universe and (almost) everything** 53

**Letters** 54

**Careering Ahead** 56

**Ariadne** 80

Something to raise your spirits.

It's traditional apparatus like this gleaming "spirit safe" that helps us take the utmost care of Teacher's whisky. It's true that all blended Scotch whiskies are made from two kinds of whisky. Malt and grain.

And we're proud that Teacher's Highland Cream has an exceptionally high malt content. Guaranteed at least 45% pure malt whiskies.

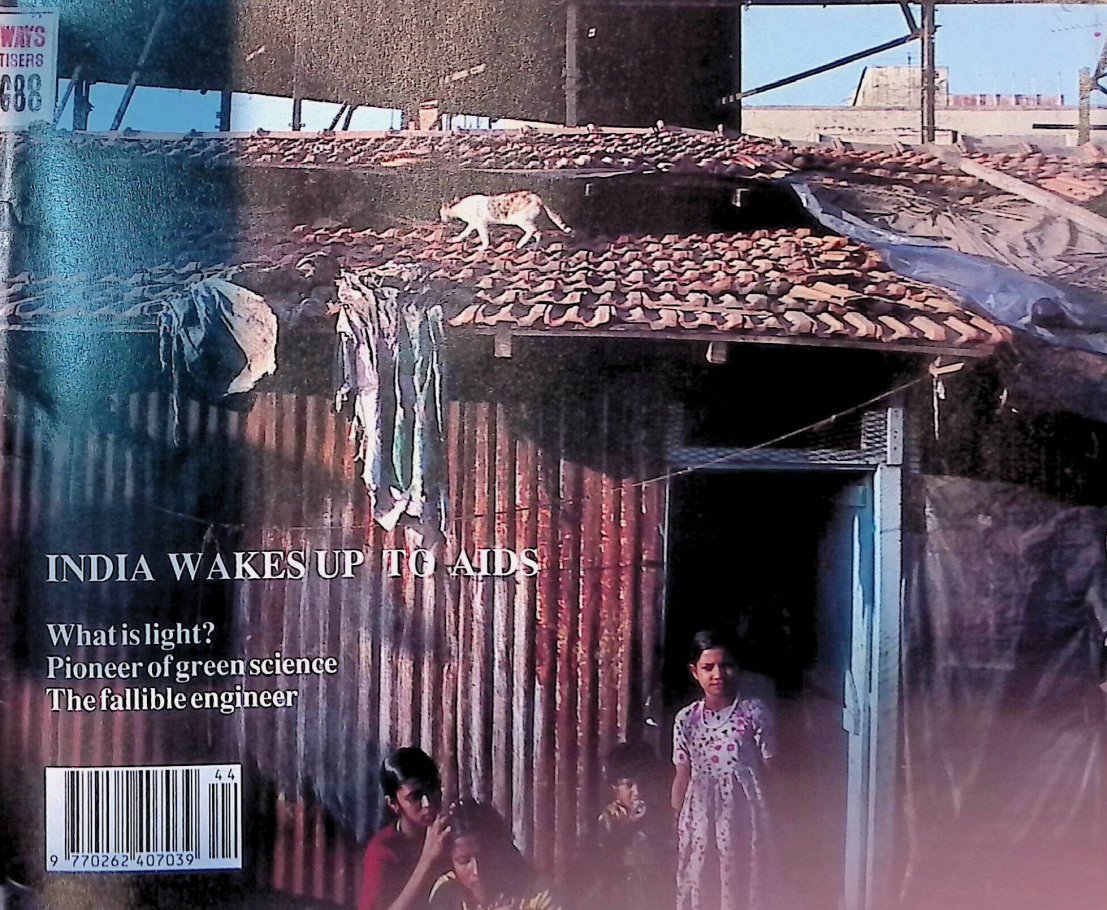

This is just one of the features which contributes to the unique character and full flavour of Teacher's Highland Cream.
